

AeroFin™

Trailer Aerodynamic Tail Device

WABASH AEROFIN™

Introducing the AeroFin™, a new concept in trailer aerodynamic tail devices. By managing airflow across the rear of trailer, the compact AeroFin effectively reduces aerodynamic drag behind the trailer. When used with our new Ventix DRS™ (drag reduction system) the combination is verified as an EPA SmartWay Elite aerodynamic device combination, providing 9% or greater fuel savings.

Automatic Operation

The AeroFin is designed to deploy and retract with swing door operation, requiring absolutely no additional interaction from the driver. The device will not interfere with trailer loading and unloading, so there is no adverse impact to freight operations. Its compact design allows it to fold easily behind the door when in holdback position. It works with most door holdback devices, including Wabash National's proprietary TrustLock® Plus system.

Engineered to Perform

Understanding the real-world abuse and demands of transportation equipment, we designed the AeroFin to provide maximum fuel economy benefits while being compact, lightweight and extremely durable. Constructed of high-strength composite panels, the AeroFin is resistant to abrasion, tearing, and impact. Its galvanized hardware resists corrosion to extend product life and ensure smooth operation year after year.

The AeroFin is engineered to perform in all weather conditions. The highly-engineered composite panels won't freeze and crack in low temperatures, and they're designed to resist snow and ice to ensure easy operation in the most extreme winter conditions. In addition, UV protection prevents the panels from warping and discoloring.

AeroFin™

Trailer Aerodynamic Tail Device

Features and Benefits

- Provides over 9% fuel economy improvement when used with Ventix DRS
- EPA SmartWay Elite verified aerodynamic device combination
- Non-intrusive rear drag reduction device
- Auto deploys when doors open and close with manual override
- Impact and abrasion resistant – made with custom engineered composite panels for optimum weight, flexibility, strength and durability

BASE SPECIFICATIONS

- Top panel: 24" x 100"
- Side panels: 18" x 80"
- Weight: 70 lbs
- Panel material: Glass reinforced thermoplastic composite
- Color: White (custom colors available)
- Fits all van trailer makes and models
- Material is 100% recyclable
- UV resistant

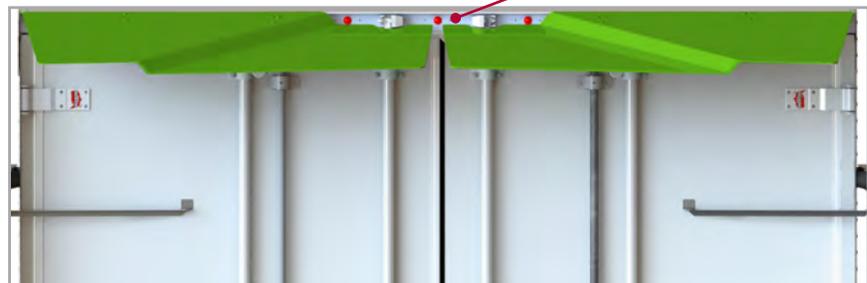

Top panels fold automatically when lock rod is disengaged and door is opened

Top panels direct high velocity airflow downward to reduce wake

Side panels direct high velocity airflow inward to reduce wake

Auto deployment with lock rod operation

Opening for light visibility
