

TRUCK BODIES

Lighter.
Longer life.
Lower total cost of ownership.

Finally.

Your ability to deliver freight efficiently and predictably has never been more important to your customers and to your business. Look no further than Wabash for a truck body with the quality and performance required to meet today's industry demands.

Introducing the **Final Mile Series** of dry truck bodies, featuring **Wabash DuraPlate®** technology, and the **Cold Chain Series** of refrigerated truck bodies, featuring breakthrough molded structural composite with thermal (MSCT) technology.

The best-performing truck bodies you will ever operate.

Real ROI is finally here. Wabash National introduces the more durable, longer-lasting truck body you've been waiting for—with a lower total cost of ownership.

Experience-driven performance.

Listening to carriers and understanding that they measure performance in cost per mile—that's what drives innovation at Wabash National. We've developed high-performing truck bodies that deliver the peace of mind that comes from knowing you are being taken care of by Wabash. Reliability in both product and service makes operating Wabash truck bodies easier and more valuable to your business than any other option available today.

Warranty like no other.

Like our truck bodies themselves, we created a high-performing warranty to back them.*

The Wabash warranty is simple and straightforward: five-year coverage on every truck body part. Across the board. And if your truck bodies are made with DuraPlate®, add an additional five years on the sidewalls.

We're confident we make the most durable, longest-lasting truck bodies in the industry. We want you to be confident too.

"I absolutely, fully believe that Wabash truck bodies have revolutionized the way we can do things. I've reached out to the rest of our branch managers to let them know that the next time they're ready to buy a box truck, they need to seriously consider bringing the Wabash product into their fleet."

Eric Cameron, branch manager
American Metals Supply Company

At our ISO 9001 facility, craftsmanship and lean manufacturing aren't just our strength, they're our culture.

Final Mile Series

Dry Truck Bodies

You don't have to settle.

Innovation meets low cost of ownership in the **Final Mile Series**. Featuring proven **DuraPlate®** technology, this durable dry truck body is designed for long-life performance.

Heavy-duty door track protection reduces damage and increases uptime. The **fully galvanized rear frame** provides superior corrosion protection and longer life. **Recessed grab handles** resist dock damage time after time.

One-piece extruded aluminum head provides superior impact resistance, and the **rugged corner protection** resists damage from other obstacles. **Square corners** resist damage.

Seamless, encapsulated foam design prevents moisture from migrating into the foam and interior. The **smooth sidewall** is perfect for easy cleaning.

Bonded DuraPlate sidewalls are made in the USA and are 4x stronger than traditional sheet-and-post designs. Bonded panels eliminate posts, snag points and potential leak points while enhancing overall aesthetics.

16,000-lb floor rating is standard and forklift capable. Flooring surfaces are made of sheet aluminum or steel.

The **16,000-lb floor rating** is standard and forklift capable. The **fully galvanized subframe** provides superior corrosion protection and longer life.

The DuraPlate Difference

American-made DuraPlate consists of two external steel skins thermally bonded to a high-density polyethylene (HDPE) core. Available in a variety of core formulations to reduce weight in specialty applications, DuraPlate is the world's most advanced sidewall material available. The proof is undeniable. No other truck body composite is as durable, impact resistant and aesthetically pleasing as DuraPlate.

MSCT.

High-performance MSCT composite improves thermal efficiency up to 25 percent. The structural strength eliminates the need for metal or wood in the panel, reducing truck body weight up to 15 percent.**

Innovative MSCT Technology

Used in the sidewalls, nose, floor and roof, our new molded structural composite with thermal (MSCT) technology boosts thermal efficiency by up to 25 percent over conventional designs and reduces weight by as much as 15 percent—all while providing greater abrasion and impact resistance to extend your truck body life.

Also available with traditional reefer construction

Our innovative Cold Chain Series truck bodies are also available using more conventional reefer construction. But this is where “conventional” stops. From thermal breaks that prevent heat transfer, to our computer-controlled foaming process that ensures void-free sidewall insulation, these refrigerated truck bodies maintain your specified operating temperature, with fewer reefer unit hours.

Why Wabash truck bodies?

Wabash National is North America's leading producer of semi-trailers. In fact, we've built more than 1,000,000 of them.

Truck bodies are the next chapter in our proud heritage—one built on a culture of continuous improvement and with a commitment to understanding customer needs. Wabash is ready to raise the bar in final mile transportation—and bring operational efficiencies to you.

We've perfected truck bodies by leveraging our R&D test center and applying the same innovative engineering we've poured into our trailer products for decades. The result: high-performance truck bodies unlike any other.

Everything Wabash stands for—now in a truck body.
